Your products as advertising media

We are the brand for professionals who rely on top-quality products.

Mopptex is primarily a private label producer of mops, microfibre cloths and other cleaning textiles in all variations and designs.

Quality and sustainability are our priorities! As we operate our own production facilities in Europe, we can offer our customers a very prompt, professional and customised service of the highest quality.

Our fabrics and services are specially adapted to the needs of professional users. Our status among our valued customers is consolidated by our custom developments and solutions. Our technical facilities and expertise allow us to serve you with both innovative new developments and low-cost products. We also offer our customers various logistical solutions to open up a range of distribution strategies.

In addition to our individual solutions, you can rely on a standard range that meets your needs and the needs of the market and is always in stock!

Our products are supplied in a neutral appearance or as a customer own brand if required.

State-of-the-art machinery

Our Austrian headquarters and our site in Poland together employ around 250 people and operate a space of approx. 16,000 m² for general administration, warehousing and production.

This makes us the leading producer in Central Europe with a special focus on general cleaning textiles, microfibre cloths and mops in industry, for professionals and for the consumer goods market.

Our machinery is among the most modern and effective.

Our sustainability concept

We are aware that our future success depends on our ability to offer consumers safe, sustainable products and so we are committed to socially responsible business along the entire value chain.

Company

- Continuous investments in renewable energies (such as photovoltaic systems)
- Switch from old heating systems to air source heat pumps
- Investments in state-of-the-art production facilities to save energy and resources
- Certifications: ISO 9001:2015, SMETA 2 Pillar & EU Ecolabel
- Prevention of environmental damage at company locations
- Regular process optimisations to reduce rejects
- Corporate social responsibility: financial support for development work, social associations and youth activities

Products

- Selection of sustainably produced raw materials
- Increased selection of certified raw materials (such as Ecolabel yarns)
- Increased percentage of recycled raw materials
- Continuous expansion of the range with products made either fully or partially from recycled materials
- Switch to environmentally friendly finishing processes for our textiles
- Goal of reducing microplastics in textiles, see also the verified laboratory report

Employees

- Responsible treatment of employees, strong consideration of social and family-related aspects/interests
- Strict observance of social standards
- Regular monitoring of safety precautions on company premises by external experts for safety purposes
- SMETA certification: Regulation of humane, fair and social treatment of employees
- Employee exercise facilities provide opportunities to train physical and mental health
- Exclusive use of machines with TÜV or CE marking to protect employees in the production process
- Regular employee safety training
- Strict compliance with legal requirements for environmental, social and labour law aspects

Environment and carbon footprint

- Installation of systems for renewable energies (such as photovoltaic systems)
- Complete company fleet based on electric vehicles
- Reduction of microplastics in production
- Deliveries to the customer (parcels and pallets) are climate-neutral – zero emissions by Mopptex
- Selection of raw materials to increase the product service life and thus reduce waste
- Gradual reduction of packaging materials to a minimum or switch to paper alternatives
- Optimisation of packaging and packaging sizes for volume-optimised transportation of goods
- Goal of making products to the highest quality standards for long-lasting multi-use products that can be reused to the greatest extent possible
- Goal of continuously expanding the range of products with a high percentage of recycled materials
- No strong focus on disposable items
- Employees are incentivised to use public transportation

zero emissions by MOPPTEX

With "zero emissions", we support our customers in their path towards climate neutrality and a more balanced life cycle assessment.

The amount of CO₂ emitted is determined with the help of EcoTransIT. In spite of every effort, most shipments cause carbon emissions. With measures such as reforestation or the expansion of renewable energies, climate protection projects can offset these emissions. Independent organisations check actual emission outputs and calculate the offsetting measures required to balance them out. With zero emissions, tailored measures are taken quickly.

The amount of carbon emitted is collected with the help of EcoTransIT. The transport management system (TMS) from the Mopptex transport partner provides the data basis. During calculation, the preliminary leg, main leg and final leg of the transport are considered as well as the specific mode of transportation. The EcoTransIT calculation method complies with European standard DIN EN 16258 and GLEC.

On request, we provide you with a certificate indicating your contribution and showing that all generated emissions have been offset completely.

Selection of the most suitable and finest fibres for every product and its intended application.

Features:
 Acrylic/polyester blend, inside fringe, outside fringe, pouches with ties.

Application area:
 Universal cleaning, maintenance cleaning.

Application: Moist cleaning
Washable: 60° C
Suitable for tumble drying: Yes

Hospital mop EV01

Tufting

Art. no. 40 cm: 400108
 Art. no. 50 cm: 400109

Features:
 The hospital mop is made from MICROFIBER and COTTON mixed fibres. This fibre combination results in a mop with excellent sliding properties and much higher dirt absorption than conventional cotton mops. Colour-coded labels are attached to this mop. The pouch and carrier material are made from robust polyester fibre. Loop-pile inside, fringe outside.

Application area:
 Hospital cleaning, rest homes, universal cleaning, maintenance cleaning, hospital

Application: Moist cleaning
Washable: 60 - 95° C
Suitable for tumble drying: Yes
Box contents: 50 items/box

Hospital mop EV02

Tufting

Art. no. 40 cm: 400118
 Art. no. 50 cm: 400119

Features:
 Mop with mixed cotton/microfibre fabric. The hospital mop is made from MICROFIBER and COTTON fibres. This fibre combination results in a mop with excellent sliding properties and much higher dirt absorption than conventional cotton mops. Colour-coded labels are attached to this mop. The pouch and carrier material are made from robust polyester fibre.

Application area:
 Universal, hospital, rest homes, healthcare

Application: Moist cleaning
Washable: 60 - 95° C
Suitable for tumble drying: Yes
Box contents: 50 items

Mixed-fibre mop EV04

Mixed-fibre mop tufting

Art. no. 40 cm: 400190
 Art. no. 50 cm: 400191

Features:
 The mixed-fibre mop EV04 is made from microfibre, cotton, polyester and viscose. This combination gives the mop excellent sliding properties, absorption and dirt retention compared with cotton mops. The pouch and carrier material are made from robust polyester fibre. Loop-pile inside, fringe outside.

Application area:
 Universal cleaning, maintenance cleaning, general properties, hospitals, rest homes

Application: Moist cleaning
Washable: 60 - 95° C
Suitable for tumble drying: Yes
Box contents: 50 items

Suitable for tumble drying:	Yes
Box contents:	50 pieces

Double mop COTTON/MICROFIBRE Loops

Tufting

Colour	Art. no.
Blue	400164
Red	400163
Yellow	400162
Green	400161

Features:

Suitable for double mop wiping systems. Mop with mixed fibre combination cotton/microfibre. This fibre combination produces a mop with excellent sliding properties. This double mop has at the same time a much higher dirt absorption than conventional cotton mops. The pocket and carrier material consist of a robust polyester fibre.

Application area:

Universal cleaning, maintenance cleaning, hospitals, retirement homes, health care facilities

Application:	Moist cleaning
Washable:	60 - 95° C
Suitable for tumble drying:	Yes
Box contents:	50 pieces

Parquet mop PRO

Woven

Art. no. 40 cm:	400300
Art. no. 50 cm:	400301

Features:

The PARQUET MOP PRO is particularly suitable for parquet and laminate flooring. The item is made of a special polyester/cotton blend (not microfibre) that cleans sensitive and treated surface without damaging them.

Application area:

Parquet, wood, laminate, etc.

Application:	Use only slightly damp, not wet!
Washable:	60 - 95° C
Suitable for tumble drying:	Yes up to 60° C
Box contents:	50 items

Microfibre mop flat press

PREMIUM white

Art. no. 40 cm: 100147

Features:

Suitable for common flat press holders made of stainless steel and plastic. Made from white plush with quilted seams. The microfibre mop, flat press, in white, is made in Germany from 11-mm pile of the finest fibres. Excellently suited to universal cleaning. Can be used for a wide range of daily cleaning tasks. The mop also features a fleece water repository and a robust cover as abrasion protection for the back. The pouches are made from durable and robust polyester with PVC coating. The insertion strip of the pouch is designed to make the mop holder easier to insert. Made from 100% microfibre

Special feature:

The quilted seams achieve a grooved surface texture. This significantly improves the sliding properties.

Application area:

Hospitals, rest homes, universal cleaning, maintenance cleaning.

Application:	Moist cleaning
Washable:	60 - 95° C
Suitable for tumble drying:	Yes
Box contents:	50 items

Microfibre mop flat press

SELECTION ECO white

Art. no. 40 cm: 100141

Features:

Suitable for common flat press holders made of stainless steel and plastic. Various border colours.

Special feature:

Made from premium microfibre plush in white. In colour variants red, blue, yellow, green.

Application:	Moist cleaning
Washable:	60 - 95° C
Suitable for tumble drying:	Yes
Box contents:	50 items

Microfibre mop flat press

SELECTION blue

Art. no. 40 cm: 100140

Features:

Suitable for common flat press holders made of stainless steel and plastic. Made from 100% polyester microfibre.

Special feature:

The yarn is bound together in a special process. The bound yarn is made up of filaments of different strengths. After washing, the mop has a super-dense surface, incomparable cleaning power and outstanding sliding properties.

Application area:

Hospitals, rest homes, universal cleaning, maintenance cleaning.

Application:	Moist cleaning
Washable:	60 - 95° C
Suitable for tumble drying:	Yes
Box contents:	50 items

Microfibre mop flat press

PREMIUM mottled blue

Art. no. 40 cm: 100167

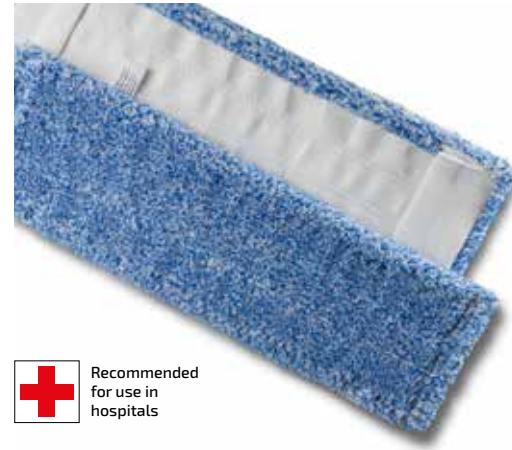

Features:

The microfibre mop PREMIUM BLUE flat press wipes incredibly smoothly and offers impressive water absorption. The very dense, mottled blue microfibre plush is the main feature. The mop features a fleece water repository and a robust cover as abrasion protection for the back.

Application area:

Hospitals, rest homes, universal cleaning, maintenance cleaning, staircases

Application: Moist cleaning
Washable: 60 - 95° C
Suitable for tumble drying: Yes
Box contents: 50 items

Recommended for use in hospitals

Microfibre mop flat press

PREMIUM Blue-Striped

Art. no. 40 cm: 100149

Features:

Suitable for common flat press holders made of stainless steel and plastic. Made from white plush with soft polyamide bristles and blue lines. The blue-striped microfibre mop flat press offers improved sliding properties and dirt removal power than conventional microfibre mops thanks to the soft polyamide bristles. The mop features a fleece water repository and a robust cover as abrasion protection for the back.

Application area:

Hospitals, rest homes, universal cleaning, maintenance cleaning.

Application: Moist cleaning
Washable: 60 - 95° C
Suitable for tumble drying: Yes
Box contents: 50 items

Recommended for use in hospitals

Particularly suitable for laundries

Microfibre mop flat press GLIDE

PREMIUM blue bristles, mottled

Art. no. 40 cm: 100148

Features:

Dense bristles in the product colour achieve increased dirt removal power and improved sliding properties. The mottled blue, dense, long-pile microfibres ensure a high level of dirt absorption and residual dirt is no longer visible after washing. The mop features a fleece water repository and a robust cover as abrasion protection for the back.

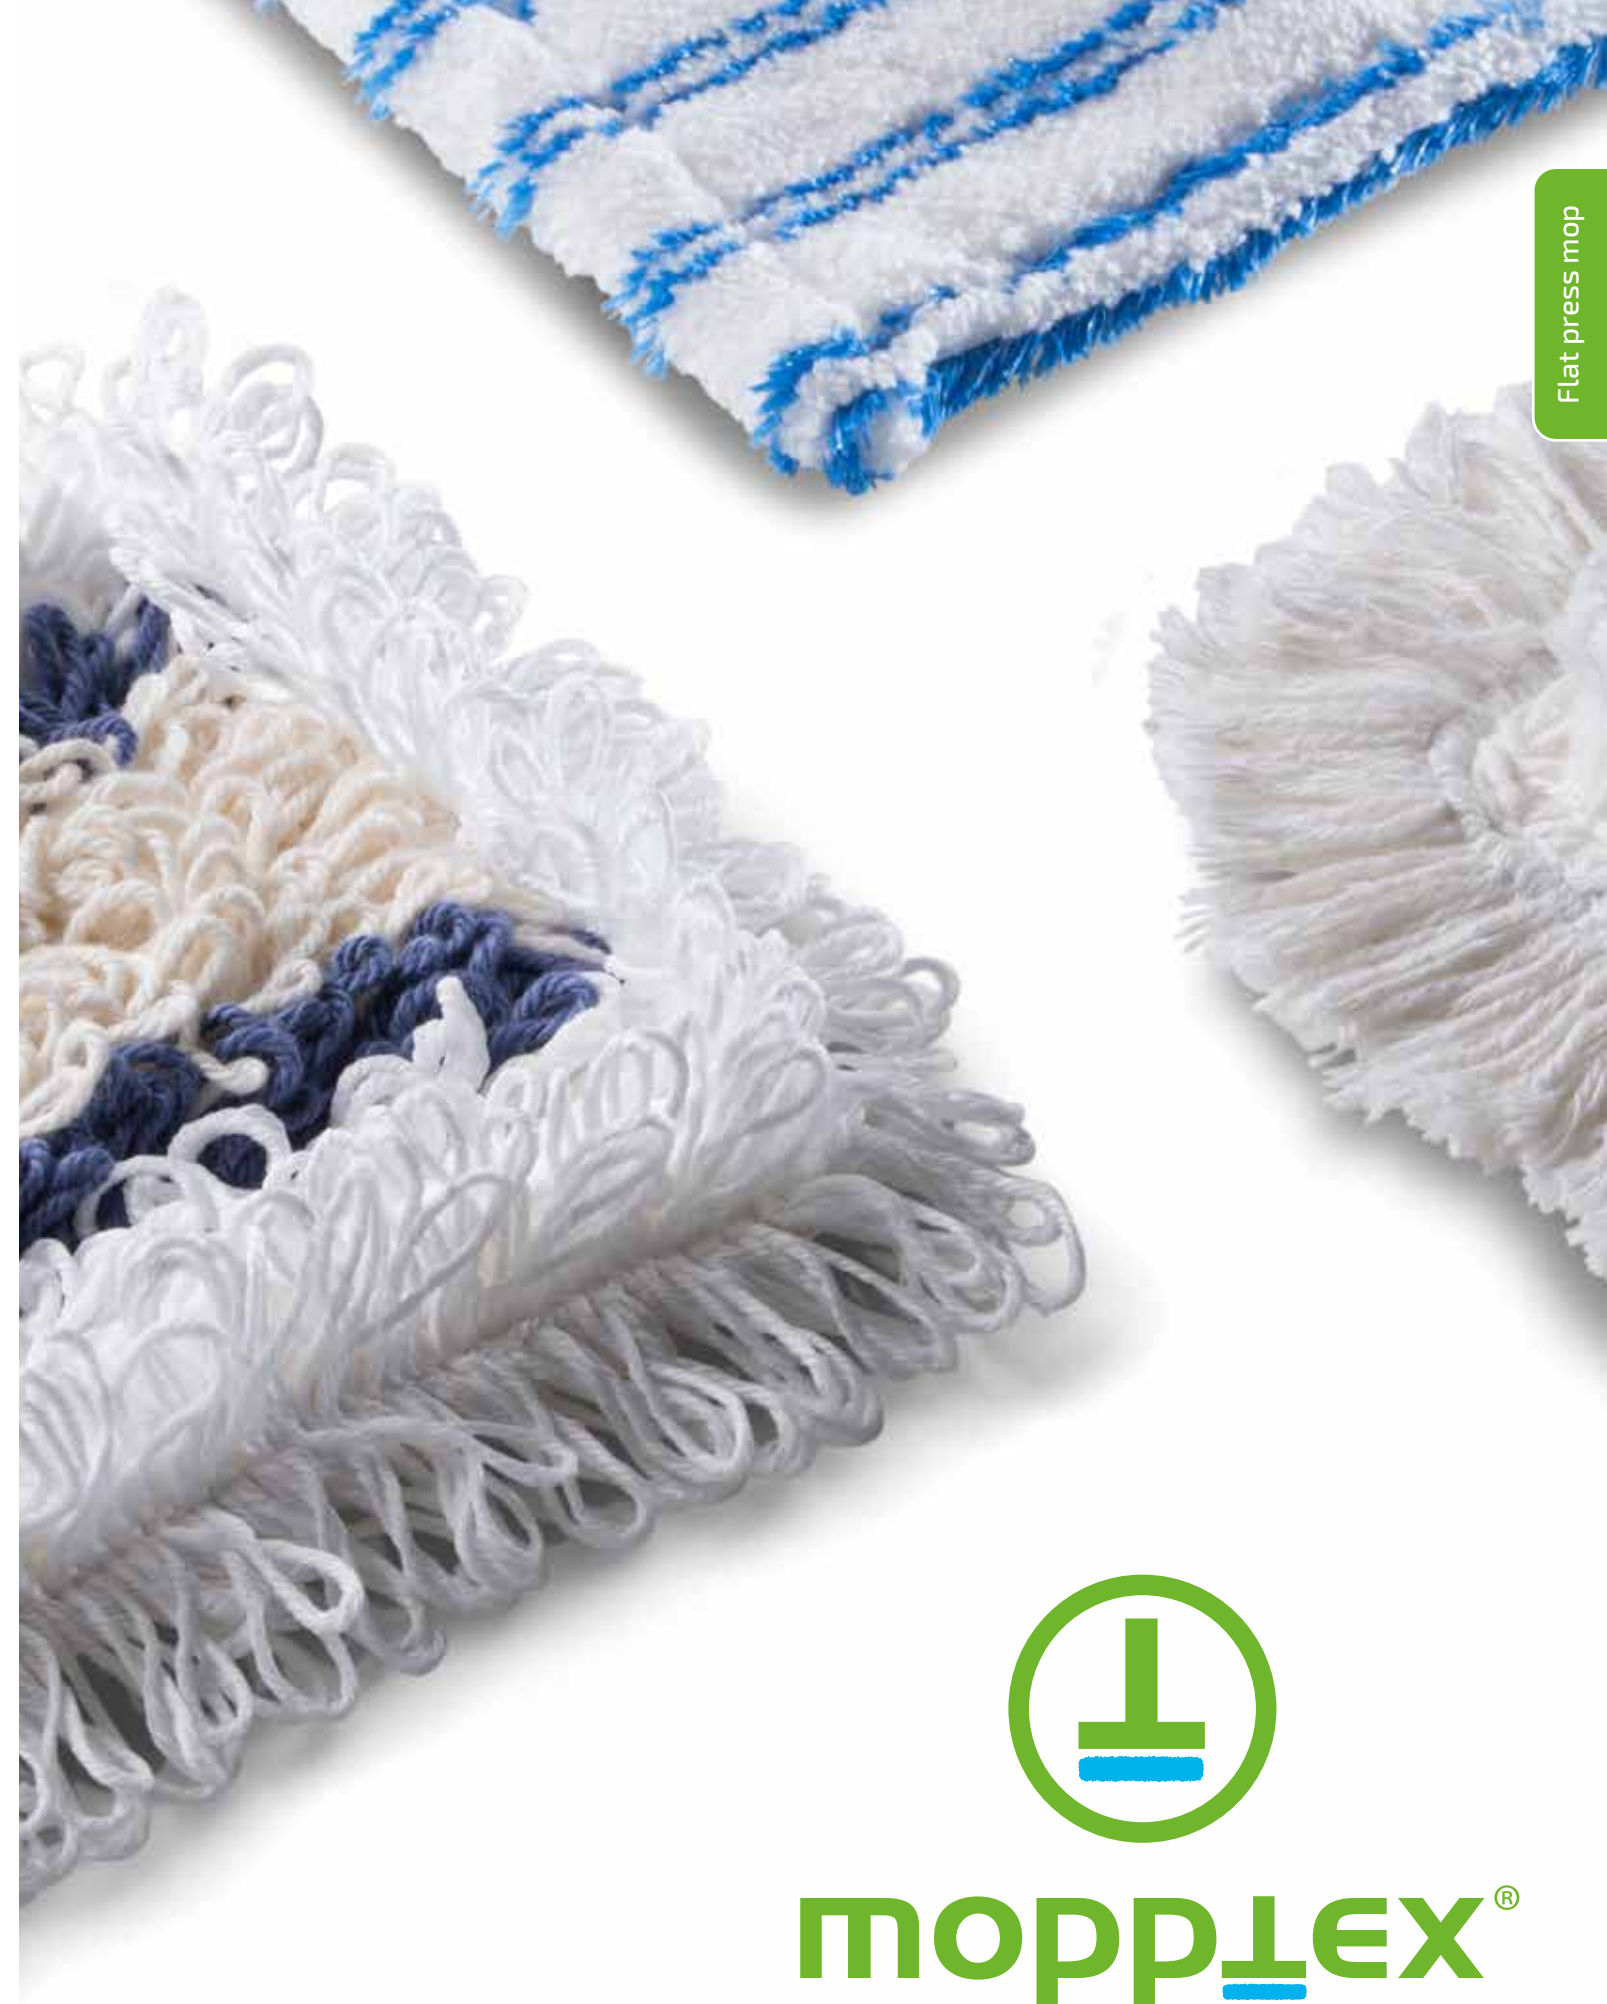

Application area:

Hospitals, rest homes, general properties, universal cleaning, maintenance cleaning.

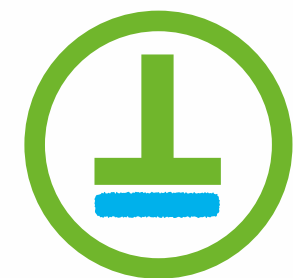

Application: Moist cleaning
Washable: 60 - 95° C
Suitable for tumble drying: Yes
Box contents: 50 items

Recommended for use in hospitals

Disposable microfibre cloth FLEXI

Colour	Art. no.
Blue	100576
Red	100577
Yellow	100578

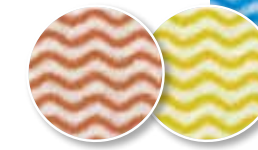

Features:

Certain hygiene requirements may prohibit the use of reusable cleaning textiles. In special cleaning applications, processing reusable products may not be profitable or hygienic either. The use of efficient disposable mops is recommended for these purposes. Thanks to their structured surface, FLEXI disposable products offer very good sliding properties.

Application area:

Universal maintenance cleaning, fast, uncomplicated cleaning, organic soiling, high loss rates and much more

Cloth size: approx. 30 x 30 cm
Washable: Disposable
Box contents: 20 sets, 50 items each

The FLEXI disposable microfibre cloth is available in 3 colours!

FILSAIN® DESI Cloth

Colour Art. no.
 White 300345

Features:
Stable, durable PREMIUM disinfectant cloth, specially designed for the regular use of disinfectants.

Application area:
For the disinfection of all common surfaces and devices.

Cloth size: approx. 40 x 40 cm
Weight: approx. 41 g/cloth
Edging: Particularly strong, dimensionally stable
Washable: 60° C
Box contents: 200 items

Recommended for use in hospitals

Particularly suitable for laundries

Resistant to disinfectant

Tested by Hohenstein

Laboratory research objective and evaluation:

Due to positive charge, quaternary ammonium compounds own a high adsorptive and absorptive capacity to negatively charged surfaces, as for example cellulose fibers and conventional microfibers. By reason of this connection, active substances may no longer be available in sufficient concentrations for disinfection.

In order to ensure safety and functionality, MOPPTEX has developed special fiber structures and adapted them to the requirements of disinfection. This was underpinned by a 4 fields laboratory test by HOHENSTEIN Laboratories Germany.

In the study, the evaluation criteria of DIN EN 16615.2015-06 – Quantitative test method for the determination of bactericidal and yeasticidal activity on non-porous surfaces with mechanical impact using FilSain® DESI cloth in the medical area – were used.

Evaluation: under the conditions tested, a perfectly harmonizing bactericidal and yeasticidal activity, test report no. 18.8.1.1597, was confirmed.

FILSAIN® Microfibre cloth UNIVERSAL

Art. no.: 300320

Features:

The FILSAIN® brand cloth is made from selected PREMIUM matrix fibres and offers unbeatable cleaning performance. It is streak-free and has an extreme polishing effect. You can see the gleaming difference from conventional microfibres with your own eyes. Once you try it, you will never go back to another cloth.

Appearance:

Smooth texture with rectangular design

Washable: 60° C

Box contents: 20 bags of 10

FILSAIN® Microfibre Cleaning pad PREMIUM

Art. no.: 200400

Features:

The FILSAIN® cleaning pad is made from high-quality, selected MATRIX microfibres and offers unbeatable cleaning performance. And it is "Made in AUSTRIA". The fibres and woven texture enable windows to be cleaned without streaks, and the polishing effect is extreme. Easy to clean up to 8 windows with one pad when spray-cleaning. Time taken per window just 15 seconds!

Application area:

Windows, mirrors, tiles, wet rooms, high-gloss

Application:

Ideal for spray cleaning

Cloth size: approx. 31 x 12 cm

Washable: 60° C recommended, up to 90° C possible

Suitable for tumble-drying: Yes

Box contents: 100 items

FILSAIN® Dirt eraser

Art. no.: 700400

Features:

The FILSAIN® dirt eraser removes stubborn dirt and stains with ease. It does away with shoe marks, tea and coffee stains, red wine stains and lime residues just as well as pen and crayon marks. The dirt eraser is also suitable for all types of textiles and smooth surfaces.

The eraser removes spots without chemical cleaning agents. Simply wet the eraser and it's ready to go. With extra-dense pores and a firmer structure, the Filsain dirt eraser is especially long-lasting.

Application area:

Household, kitchen, bathroom, walls, doors, garden, vehicles, furniture, toys and much more

Size: 13 x 5,5 x 3 cm

Density: 9 kg/m³

Box contents: 28 sets, 10 items each

Cleaning pads

- Hand pad
- Cleaning pads

Microfibre Sani pad ABRA

Colour	Art. no.	Logistical benefits
Blue	200434	• Less space required than conventional scouring pad
Red	200433	• Less space required in the washing process
Yellow	200432	• Can be washed much more often than conventional scouring pad
Green	200431	• Hygiene benefits

Features:

Ergonomic, round cleaning pad made from synthetic, robust and resistant fibres for germ-free sanitary cleaning and scrubbing. Abrasive texture for scratch-free scrubbing of ceramics, porcelain and all other washbasins, bidets, baths and urinals. The product can be washed repeatedly and offers significant advantages over conventional scouring pads:

Application area:

Sanitation, washbasins, urinals, WC bowls, bidets, etc.

Size:	12 cm diameter
Washable:	90° C
Suitable for tumble-drying:	Yes
Box contents:	200 items

Microfibre Hand pad SANI

Red or blue bristle

Colour	Art. no.
Blue	200430
Red	200420

Article:

The rows of coarse bristles give this pad excellent dirt removal properties and ensure it wipes perfectly smoothly. The microfibres perfectly absorb the dirt removed by the bristles and release it again during washing. Recommended for sanitary areas, tiles, baths and wet rooms.

Application:

Sanitation, tiles, baths, wet rooms

Size:	28 x 10 cm
Washable:	60 - 95 ° C
Suitable for tumble-drying:	Yes
Box contents:	100 items
